## PRESS RELEASE

### Cool Technology Edition

FOR IMMEDIATE RELEASE | July 18, 2012

# NRCard™ Transforms your Nook™ into an Android Tablet: No, Seriously!

**360 Mobile Solutions**' innovative, cost effective, and easy technology, the **NR Card™**, transforms **Nook™** into an **Android Tablet**. The company launches its innovative **NR Card™**, an interactive tutorial section on the **NR Card™** website, a **GREEN** Initiative, and solidifies overall company mission to make technology accessible to **ALL**.

**Chicago, Illinois** - July 18, 2012 - "What good is a technology if it isn't accessible?" says **360 Mobile Solutions** President **Nabeel Shaukat**, and creator of the **NR Card™** an easily configurable SD Card that allows **Barnes and Nobles' Nook™** eReader to double as a tablet running **Android OS**.

**Shaukat** asks this question in the wake of the fairly recent tablet craze that seems to be making **entrepreneurs** more productive and efficient in running their businesses, **children** more computer savvy and excited about technology as they gain access to revolutionary systems like the **Android OS** or **Apple's iOS**, and **moms** multitask like never before. The concern, however, is that tablets aren't generally affordable, and those that should be able to benefit - perhaps those mostly in need, can't. **Sharjeel Shaukat**, the company's **Chief Operating Officer** adds, "we want potential geniuses in rural areas with limited access to tablet devices, broadband, and that are facing all of the other disparities in technology that we as a company fight for, to experience this technology. We also want the mom who simply comfortable with the light weight of her **Barnes and Nobles' Nook™**, doesn't see the need to carry two devices, or doesn't want to spend the extra money on a new tablet, to benefit as well. That's our business. That's what we love."

"eReaders [like the Nook and Kindle] were actually around before the tablet, and we find people using them more and more as the demand for technology grows, and our economy, unfortunately doesn't," says **Malik Shamsuddin**, **360 Mobile's** Chief Marketing Officer. "We wanted to produce a product that has the affordability of an eReader with the power of an **Android Tablet**. It allows those without access or simply those that are on the fence about adopting a new tablet, to adopt tablet technology. For about \$200\*\* The **NR Card™** is available in 8GBs, 16GBs, and 32GBs and ranges from \$24.95 to \$64.95 (Nook Reader Device not included)."

#### NR Card™ Specs

The **NR Card™** is a dual bootable microSD memory card equipped with the **Android 2.3 Gingerbread OS**. Installation is as simple as plug and play. Simply insert the **NR Card™** into the memory card slot and power on your **Nook Color™** or **Nook Tablet™** device. The **Android OS** will boot directly from the **NR Card™** and therefore won't void your warranty. The **NR Card™** allows you to dual boot between **Android OS** and the native **Nook** platform seamlessly.

The **NR Card™** is fully optimized to operate safely and efficiently on the **Nook Color™** and **Nook Tablet™** eReaders.

#### The **NR Card™** Green Initiative

**360 Mobile Solutions** and **NR Cards™** are committed to supporting eco-friendly initiatives that sustain and protect the environment. To raise awareness about helping the environment and supporting green initiatives that help reduce carbon emissions, **360 Mobile Solutions** has partnered with the **National Forest Foundation**, a non-profit organization, dedicated to rebuilding local forests affected by wildfires, insects, diseases and other natural events that have caused a significant loss of forest cover. Through their **Plant a Tree Project** **360 Mobile Solutions** will plant a tree on behalf of customers for each **NR Card** purchased from their website or partner stores.

\* Based on \$169 Nook Color and \$24.95 NR Card
